

MGH Healthcare Transformation Lab Applied Research Fellowship in Healthcare Innovation Program Overview

The MGH Healthcare Transformation Lab (HTL) is currently seeking applications for our one-year Applied Research Fellowship in Healthcare Innovation. HTL's founding mission is to improve the experience and value of healthcare through collaborative innovation. The fellowship program (now in its fourth year) provides a unique opportunity for physicians to have protected time to develop and engage in care delivery transformation projects at MGH with mentorship from experts in the field as well as support from senior leadership. Using principles of innovation science and leveraging new technologies, fellows are encouraged to pursue projects that enhance the delivery of healthcare—making it a better experience for patients/clinicians and potentially more affordable and/or higher-value.

Prospective applicants are physicians (across all specialties) with a strong interest in care delivery innovation and implementation science, as well as a track record of academic productivity. Specifically, we seek early-career faculty and residents/fellows in their professional development or research years, who have the potential to become leaders in the discovery and implementation of care delivery innovations.

Fellows are expected to devote around 80% of their time exclusively to fellowship activities. During this time, fellows have the opportunity to develop and implement their project, as well as interact with various leaders in the healthcare innovation field at MGH, Harvard Medical School, and the wider Boston-area community. Fellows are also encouraged to spend around 20% effort on their respective clinical duties.

The fellowship provides competitive salary plus benefits for one year (July 2021 – June 2022).

Program Information

Fellowship Program Director: Dr. Jared Conley (jconley@mg.harvard.edu)

HTL Managing Director: Paula McCree (pmccree@partners.org)

MGH Healthcare Transformation Lab Applied Research Fellowship in Healthcare Innovation Application

Eligibility

Prospective applicants are physicians (early-career faculty and residents/fellows in their professional development or research years) with a strong interest in healthcare innovation and implementation science.

Application

- 1) Please address the following questions in a personal statement:
 - a) Describe your interest in healthcare transformation and the HTL Applied Research Fellowship in Healthcare Innovation
 - b) Which domains of healthcare innovation appeal to you the most?
 - c) What is your background and what skill sets or area(s) of expertise will you bring to the fellowship program? (If you are already engaged in a project you would like to continue, please let us know.)
 - d) How do you envision your ideal career trajectory?
 - e) What would you like to change in the experience and delivery of health care during a potential fellowship and/or within the next 5 years?
- 2) Curriculum vitae (CV)
- 3) Two letters of recommendation: Please have the letters of recommendation sent directly to: hctransformationlab@partners.org

Submit your personal statement and CV via email to: hctransformationlab@partners.org

Timeline

Application Deadline: Priority given to applications received by September 30, 2020

Interviews: October 2020

Final decision: November 2020

Start date: July 2021
